

Future interaction ablation on frozen context groups

● R0 ● R1 ● R2 ● R1-R0 ● R2-R0 □ R2-R1

Heterogeneous 20 m: n=25,113; VP context 20 m: n=23,209

Paired whole-scene percentile 95% CI; 150 VAL scenes, 1,000 resamples, seed 2022.
Negative differences favor the new variant. One seed; subgroup intervals descriptive.
R0/R1/R2 share all six trajectories.
